

### Grading One Acre or More Eligibility Standards

A General Permit is available for a grading project under NR 341, Wis. Adm. Code. To qualify for this general permit, your project must meet specific eligibility standards. This application packet is designed to allow you to supply the needed information for us to assure your project is eligible for a general permit. You will want to begin by supplying all the information contained in the checklist below. If your project is eligible, or meets all the criteria below, you should then fill out the general permit application and furnish that to the identified office for review. If you do not supply all the information contained in the eligibility requirements checklist or on the application your project cannot be reviewed. We will respond within 30 days to notify you that your project is approved or that additional information is required to complete your application. In some cases, you may be notified that your project requires an Individual Permit.

### Eligibility Standards

Applicant Check Box	What is Needed to Be Eligible?	Where should I place/find this info?	DNR Use Only
	You must submit photographs showing the entire project site in relation to the navigable watercourse in pre-construction condition	Attachment	
	Waterway General Permit application form (3500-108)	Form	
	Fee sheet and correct check for fee (3500-53A)	Form	
	The grading site must not be located in or adjacent to any of the following: <ul style="list-style-type: none"> <li>a. A state natural area designated or dedicated under ss. 23.27 to 23.29, Wis. Stats.</li> <li>b. A federal wild and scenic river designated under s. 30.27, Wis. Stats., or 16 USC 1274 (a)(8).</li> <li>c. A state wild river designated under s. 30.26, Wis. Stats.</li> </ul>	Form/Plan	
	Your project must be planned to meet all the stormwater standards including buffers.	Plan	
	Complete a re-vegetation plan that adequately stabilizes the site.	Plan	
	The difference in elevation between pre- and post-construction contours does not exceed 5 feet within the bank area, except for areas immediately adjacent to exposed or walkout basements where the difference in elevation between pre-and post-construction contours may not exceed 10 feet within the bank area.	Plan	
	The grading does not disturb or create a slope that exceeds 20% within the bank area.	Plan	
	To be eligible you must devise an erosion control plan that prevents erosion and meets the technical standards found at: <a href="http://dnr.wi.gov/water/wm/nps/stormwater/techstds.htm">http://dnr.wi.gov/water/wm/nps/stormwater/techstds.htm</a> .	Plan	

**Note:** If the department determines that a proposal submitted under this section has the potential to impact an endangered or threatened species in accordance with s. 29.604, Stats., the application shall be deemed incomplete. The department may not consider the application complete or issue a general permit until the applicant submits information to demonstrate one of the following:

- a. that the project either avoids impacts to the threatened or endangered species or
- b. that the project has received an incidental take authorization under 29.602, Stats.

If the project is modified, the applicant must submit the revised plan before the application can consider the application complete or issue a general permit.

Note: Local zoning ordinances may place restrictions on cutting trees in the shoreland zone. The riparian is responsible for ensuring that their project is in compliance with any local zoning requirements.

**For more information about Waterway Permitting in Wisconsin, see our website at:**

<http://www.dnr.state.wi.us/org/water/fhp/waterway/index.shtml>

## Application Requirements

All applications for a General Permit require a completed General Permit Application form #3500-108, with additional sheets as necessary. Follow the instructions below to complete the application form.

### Section I: Landowner Information

Provide the legal name of the person, firm, public organization or any other entity that owns the project site described in Section III of the application. The contact person should be the person completely familiar with the construction site activity and charged with compliance and oversight of the permit. The mailing address, phone number, and e-mail address if available, should be for the contact person.

### Section II: Contractor Information

If known at the time of application, provide the legal name of the person, firm, or any other entity that will be the major contractor in charge of the proposed project at the site described in Section III of this application. The contact person should be the project site manager completely familiar with the activity and charged with implementation of the permit. The mailing address, phone number and e-mail address if available, should be for the contact person.

### Section III: Site Information

Provide the site's official or legal name and complete address, including county, city, state and zip code. Provide the name of the waterway where the project is located. List the public lands survey location [quarter-quarter, quarter, section, township and range (to the nearest quarter section)] of the site. If the site is more than one quarter, enter the quarter that best describes the location of the site. The web site at the link below can help you with the public lands survey location: <http://maps.dnr.state.wi.us/imf/dnrimg.jsp?site=webview>. Use additional space if needed to describe the site location.

### Section IV: Additional Information

**Dates:** Enter the project's anticipated start and end dates.

**Photos:** Enter the date of photographs included with the application. Attach or enclose clear photographs of the project site. Include at least one front view and one side view that each depict the area where construction work will occur from the waterway, and one view of the entire site from the waterway. Too much snow cover or vegetation may obscure important details, so be sure that your photographs show the site in its existing condition. NOTE: You will also be required to submit photographs after your project is completed.

### Section V: Location Sketch, Materials List and Project Plans

**Location Sketch:** Provide a sketch or map that identifies the project site referenced to the nearest town road or county/state highway. Be sure the map has enough detail so that we can easily find the site. Include your fire number if applicable.

**Materials List:** Provide a list indicating the size, type, and quantity of materials that you plan to use for the project. Explain what types of erosion control methods you will use and how you will stabilize the site (for example: silt fence, straw bales, and/or seed & mulch).

**Project Plans:** Provide scaled plans showing the top and cross-section views, on the blank plan sheet in the application and additional sheets of 8-½ x 11-inch or 11 x 17-inch paper as necessary. Also submit a narrative summary of all information. Include the following in your plans and narrative:

1. OWNERSHIP. A copy of the deed, lease, land contract or other document showing ownership.
2. PERMISSION. Permission from landowner to enter the site.
3. PLANS. Plan drawing sheet.
4. DESCRIPTION. A narrative description of the proposal describing:
  - a. The project purpose.
  - b. Methods, materials and equipment to be used.
  - c. A construction schedule and sequence of work.
  - d. Erosion control and stormwater management plans in accordance with #6 and #7.

- e. Plan Summary Sheet, including: Parameters used to determine bank; square feet of grading on the bank; dimensions and area of total project area; dimensions of undisturbed area between grading and water body; maximum and average elevation change; volume of earth moved on bank; vegetation names and amounts (species and pounds of seed or number of plants); modeling method(s) used to determine post-construction runoff.
5. SITE MAP, including all of the following:
  - a. Existing topography and drainage patterns, roads, waterways, wetlands and floodplain boundaries.
  - b. Location, description and elevation of a reference benchmark, i.e., permanent vertical reference.
  - c. Horizontal and vertical scale and north arrow.
  - d. Approximate identification of the ordinary high water mark (surveyed elevation where available).
  - e. Area between the grading project and the water body to be left undisturbed.
  - f. Boundaries of the construction site, i.e., lateral extent of land disturbing construction activity.
  - g. Drainage patterns and approximate slopes anticipated after major grading activities, including the existing and proposed slope of the bank and the water level of the existing waterway.
  - h. Area of soil disturbance in square feet.
  - i. Volume of earth to be added or removed in cubic yards.
  - j. Location of any disposal area for dredged or excavated materials.
  - k. Location of major structural and non-structural controls identified in the erosion control plan.
  - l. Location of areas where stabilization practices will be employed.
  - m. Areas that will be vegetated following land disturbing construction activities.
  - n. A vegetation plan that provides for a self-sustaining vegetative cover of at least 70% for all pervious areas, and is sufficient to provide for bank stability, maintenance of fish habitat and filtering of pollutants from upslope overland flow areas under sheet flow conditions.
  - o. Areas used for infiltration of post-construction stormwater runoff.
  - p. Cross sections of pre- and post-construction contours, sufficient to show slope variability across the site with a minimum of one for every 50 feet of shoreline frontage. If the site is uniform, only one cross section is necessary.
  - q. Two foot pre- and post-construction contours
  - r. An alphanumeric or equivalent coordinate system for the entire grading site
  - s. Where wetlands are present, a wetland delineation report
6. EROSION CONTROL PLAN. A site-specific erosion control plan in accordance with s. NR 216.46(1) to (4), Wis. Adm. Code, with a site map showing all the information identified in Section V.
7. STORMWATER MANAGEMENT PLAN. A site-specific stormwater management plan (to be implemented on final stabilization of the grading site) developed in accordance with s. NR 216.47, Wis. Adm. Code.
8. BUFFER REQUIREMENTS FOR LAKES OR STREAMS (setback measured horizontally)

An undisturbed vegetated area is existing or established, and will be maintained between the waterway and any land disturbance, at a distance of (check one):

  - ☐ 75 feet for ORW/ERW
  - ☐ 50 feet for perennial and intermittent streams as identified on a USGS 7.5-min series topographic map or county soil survey map (whichever is more current)
  - ☐ 50 feet for lakes
  - ☐ 10 feet for drainage channels of 130 acres or more
  - ☐ 35 feet for any waterway that does not fall into any of the above categories

Note: Storm water practices and other structures approved under a separate grading permit such as bridges and culverts can be constructed in the protective area.
9. BUFFER REQUIREMENTS FOR WETLANDS (setback measured horizontally)

An undisturbed vegetated area is existing or established, and will be maintained between any wetland and any land disturbance, at a distance of (check one):

  - ☐ 75 feet for a wetland in ASNRIs as identified in s. NR 103.04
  - ☐ 50 feet for highly susceptible wetlands
  - ☐ 10-30 feet for less susceptible wetlands (per 10% of average wetland width)
10. ALL NECESSARY INFORMATION. All other information needed to show that the project will comply with the conditions identified in chapter NR 341, Wis. Adm. Code.

Submit your application

A fee is required for a Grading General Permit. Remit a check or money order payable to the Wisconsin Department of Natural Resources (do not send cash). An application submitted without the required application fee will be considered incomplete.

**Submit three (3) copies of the completed application, narrative and plans.** Send the complete application and fee to the DNR office listed below, based on the county where your project is located:

-------------------------------------	---	---------------------

**I have investigated whether there are any wetlands at the construction site or any wetlands that may be affected by the project.** ☐ Yes ☐ No

Be aware that the Department shall, pursuant to ch. NR 103, Wis. Adm. Code, require that the project comply with the water quality standards provisions in ch. NR 103. The presence of wetlands may affect eligibility for this general permit.

**I have investigated whether there are any listed threatened or endangered species at the construction site.** ☐ Yes ☐ No

Be aware that the Department shall, pursuant to s. 29.604(6r), Wis. Stats., determine whether approval of a general permit may affect a listed threatened or endangered species. The presence of a listed threatened or endangered species may affect eligibility for this general permit.

**I have investigated whether there are any listed cultural or historical resources at the construction site.** ☐ Yes ☐ No

Be aware that the Department shall, pursuant to s. 44.40, Wis. Stats., determine whether approval of a general permit may have an adverse affect upon historic property. The presence of historic property may affect eligibility for this general permit.

*If you checked "Yes" to any of these questions, submit supporting documents with your application.*

<b>Section VII. Permit Conditions</b>	<b>FOR DNR USE ONLY</b>
1. The permit does not authorize any work other than what is specifically described in the application and plans dated as listed above and as limited by the conditions of the permit. A permittee shall obtain prior written approval of modifications from the department before modifying a project or amending permit conditions.	Date of Application and Project Plans
2. The permittee shall notify the department at telephone number listed above before starting construction and again not more than 5 days after the project is complete.	Telephone Number (include area code)
3. The permittee shall post a copy of this permit at a conspicuous location on the project site visible from the waterway, beginning at least 5 days prior to construction and remaining at least 5 days after construction. The permittee shall also have a copy of the permit and approved plan available at the project site at all times until the project is complete.	
4. Upon reasonable notice, the permittee shall allow access to the project site during reasonable hours to any department employee who is investigating the project's construction, operation, maintenance or permit compliance.	
5. The permittee shall complete the project on or before the expiration date listed above. If the project is not completed by the expiration date, the permittee shall submit to the department a written request for an extension prior to the expiration date of the permit. The request shall identify the requested extension date and the reason for the extension. The department may grant a permit extension for good cause shown. The permittee may not begin or continue construction after the original permit expiration date unless the department grants a new permit or permit extension in writing.	Project Expiration Date
6. The permittee shall submit a series of photographs to the department within one week of completion of work on the site. The photographs shall be taken from different vantage points and depict all work authorized by the permit.	
7. The permittee shall maintain the project in good condition and in compliance with the terms and conditions of the permit, this chapter and s. 30.206, Stats.	
8. The department may modify or revoke the permit if the project is not completed according to the terms of the permit or if the department subsequently determines the activity is detrimental to the public interest.	
9. Acceptance of a general permit and efforts to begin work on the activity authorized by the general permit signifies that the permittee has read, understood, and agreed to follow all conditions of the general permit.	
10. This project shall comply with all conditions identified in the following Wisconsin Administrative Code, and identified in the Instructions for the General Permit application.	Wis. Adm. Code
<b>Section VIII. Findings of Fact</b>	
1. The Department has determined that the project site and project plans meet the standards in s. 30.206, Stats. and the following Wisconsin Administrative Code, to qualify for this General Permit.	Wis. Adm. Code
2. The proposed project will not injure public rights or interests, cause environmental pollution as defined in s. 299.01(4), Wis. Stats., or result in material injury to the rights of any riparian owner, if constructed in accordance with this permit.	
3. The Department and the applicant have completed all procedural requirements, and the project as permitted will comply with all applicable requirements of Section 30.206, Wis. Stats., and Chapters NR 102, 103, 150, 299, 310 and the following Wisconsin Administrative Code.	Wis. Adm. Code
<b>Section IX. Conclusions of Law</b>	
1. The Department has authority under ch. 30, Wis. Stats., and applicable Wisconsin Administrative Codes, to issue a permit for the construction and maintenance of this project.	
2. The Department has complied with s. 1.11, Wis. Stats.

## Section X: Certification and Permission

I am the owner of the riparian property or am the duly authorized representative and may sign this application on behalf of the owner(s) of said property. I hereby certify that the information contained herein is true and accurate. I have read and understand all of the conditions listed in this permit and in the Instructions. I have designed the project to comply with the conditions, and I will construct the above-mentioned project in compliance with all such conditions. I hereby give the Department permission to enter and inspect the site at reasonable times, to evaluate this application and to monitor compliance with any resulting permit. I understand that failure to comply with any or all of the provisions of the permit renders the authorization contained herein null and void and may result in a fine and/or imprisonment or forfeiture under the provisions of ch. 30, Wis. Stats.
